

Problem E. Implement Stack

OS Linux

Perform push and pop operations on stack. Implement Stacks and avoid using inbuilt library.

Input Format

First line of input contains T - number of operations. Its followed by T lines, each line contains either "push x" or "pop".

Constraints

$1 \leq T \leq 10000$

$-100 \leq x \leq 100$

Output Format

For each "pop" operation, print the popped element, separated by newline. If the stack is empty, print "Empty".

Input	Output
8 push 5 pop pop push 10 push -15 pop push -10 pop	5 Empty -15 -10
